REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 1 & 4-13 are allowable over the prior art of record, because the prior art is silent to a polymer electrolyte fuel cell comprising a single cell having a cathode and anode that are arranged across a hydrogen ion-conductive polymer electrolyte member, wherein each of said anode and cathode comprises a particulate catalyst, a hydrogen ion-conductive polymer electrolyte, a conductive base material, and a water repellent agent, wherein the water repellency of the cathode is higher than water repellency of the anode.

The prior art, such as Muranaka et al., U.S. Patent 5,500,292, teaches that the water repellency of an electrode can be formed with a concentration gradient. However, the reference does not teach or suggest that the water repellency of the cathode is higher than the anode. Therefore, the instant claims are patentably distinct from Muranaka.

Claims 14-20 are allowable over the prior art of record, because the prior art is silent to a polymer electrolyte fuel cell comprising a single cell having a cathode and an anode arranged across a hydrogen ion-conductive polymer electrolyte membrane, where each of said cathode and anode comprises a particulate catalyst, a hydrogen ion-conductive polymer electrolyte, a conductive porous bas material and a water repellent agent, wherein the water repellency of at least one of said cathode and said anode varies in a plane direction.

CONCLUSION

Page 3

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the

issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Any inquiry concerning this communication or earlier communications from the

Examiner should be directed to Monique Wills whose telephone number is (571) 272-1309.

The Examiner can normally be reached on Monday-Friday from 8:30am to 5:00 pm.

If attempts to reach Examiner by telephone are unsuccessful, the Examiner's supervisor,

Michael Barr, may be reached at 571-272-1414. The fax phone number for the organization

where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov.Should you have

questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at

866-217-9197 (toll-free).
